

## General Organisation

The School of Image and Sound of Vigo (Marcote Center of Studies) founded in 1997, has been opened for the past eighteen years and, it has trained professionals in the audiovisual arts. Our students are working in well-known businesses of Galicia and nationwide. Our School of Image and Sound (EISV) offers the following courses (Short cycles): Sound, 3D animation, games and interactive environments, Lighting production, Audiovisual Production and Direction. The students at the Short cycles are older than 18 and all the courses are completed in two years. At the conclusion of their academic studies at the School, students are to complete one semester to finish their professional training and as part of their certification. The school has signed an agreement of collaboration with several corporations and businesses. These agreements may be extended to complete a year of training. For these reasons, our School finds important the opportunity offered by International corporations and bussines. This occasion will introduce our students to a broader geographical area and give them the opportunity to study abroad to complete their professional education.

The EISV is a school funded entirely with private monies. The courses offered at the school are official and authorized by the Government of Galicia (Xunta de Galicia). The center does not received a subsidy or grant by the autonomic or the state government. As consequence, our students may opt for subsidy or grant offered by the Department of Education, or grants offered by our school to students of low-income families.

We are a school in the vanguard; administrators and teachers are innovators and open to new ideas. At our center of studies, we respect and support the freedom of opinion, ethnic, cultural or religious diversity. Our mission is to educate students in freedom, without limiting their creativity or their right to express in liberty. In the end, the students are trained in arts, where different ideologies build authentic pieces of art that conform the library of our school.

For all these reasons, we, at EISV, understand that without the possibility of training our students abroad we lose an important part of our ideology. The center wants to offer the students the option of completing their academic education as well as their personal formation outside Spain; where they can experience cultural diversity first hand. Moreover, they will learn about the international labor market in the welcome countries. The world is the best school and we, as an educational institution, should offer our students the possibility to become excellent professionals.

### **Internship Programme at Enterprises**

The College of Image and Sound of Vigo (Marcote Center of Studies) has been forming professional technicians of the media sector since its beginning in 1997. All students must finish their studies with the approval of the Internship Programme at Workplace (FCT, professional module of Formation at Workplaces) after the signature of an agreement between company and college.

### **How is this kind of Internship at workplace?**

Trough the cooperation agreement, the College of Image and Sound of Vigo (EISV) gives to the companies the possibility of incorporating one or several of our students as technical learners. The number of students comes determined by the company. This internship program is regulated by the article 7.3º, 239/DOGA1995 (professional module of Formation at Workplaces).

### **What are the benefits that the company can get for admitting students as technical learners?**

Our experience training professionals will let to the company the possibility to choose between a wide range of specialized students of the audiovisual sector, who can carry out a wide variety of activities or tasks. Companies have successfully incorporated this intensive term since most of them have increased their staff with some of these students after the internship.

### **Who must do the Formation at Workplace?**

This module is compulsory for those students who have successfully passed the rest of the modules of the vocational training. They must do this internship in the last three months term of their last academic year

### **How much does the Formation at Workplace take?**

There are two terms, from September to December and from April to June. The duration will be three hundred and eighty hours. During this period the student will be covered by the college's insurance.

The student who develops an activity in a company will follow the timetable and rules that the company has determined. The student will be under the supervision of a legal tutor who will take care of his formation.

### **Is there any work link between company and student?**

The Formation at Workplace Programme will only be carried out after the signature of a cooperation agreement between company and the college. However, this cooperation agreement does not mean any kind of work compromise after the internship or during this period. Although, the experience tells us that most of the companies will recruit them because of his good capacities

and enthusiasm. The college will have the responsibility of providing the insurance to their students.

**What are the compromises that the company takes?**

The company will supervise the work of the student at any moment in order to ensure the well developing of the Formation at Workplace Programme. For this reason, the company will nominate a coordinator who will supervise the programme. At the end of the Formation at Workplace, the student will have the right to receive a certificate which shows the level acquired at the workplace.

**How is the student incorporated to the company?**

The coordinator department of the Formation at Workplace Programme will get in touch with the company in order to choose the right candidate according to its necessities in that moment.
